

# Oakland Owlets' August 15, 2020 Field Trip in Search of Insects

---

The Oakland Audubon Young Birders' Club gathered on a warm and partly sunny summer day at Indian Springs Metropark. Eleven young birders families and friends along with a few experts wandered along the trails in search of the park's insects and birds. Indians Spring has an extensive restored prairie along with a demonstration native plant garden. Both places provide habitat for many pollinators. Veteran butterfly expert, Doris Applebaum, said that Indian Springs is the best place to see butterflies in Oakland County. Doris along with Susanne Greenlee led this field trip. Sue studied Orthoptera species, grasshoppers, and their relatives for the Nature Conservancy in the Midwest.

Sue and Doris introduced the group to several butterflies and many insects on the hike. It was partially sunny at the beginning of the hike but became mostly sunny. Clearly, butterflies are creatures of sunshine and more butterflies were seen later. The most numerous species observed were Clouded Sulphur and Common Ringlet. **Thirteen species of butterflies** were observed, and 43 individuals were counted.

Insects were everywhere and kept Sue busy. Sue captured and displayed several bugs to the group so everyone could see their unique features. In addition, to seeing insects, insect signs were abundant. Fall webworms, were active and obvious along with gall insects like the Goldenrod Fly. The insect orchestra was in full chorus as well. Sue pointed out several insect calls including the Carolina Ground Cricket, Meadow Katydid, and the Dog-day Cicada. Sue's expertise helped everyone learn some of the common insect calls of late summer.

Families socially distanced and young birders were able to see some of the beautiful places at the park. Young birders club hikes encourage participants to develop a sense of wonder and curiosity about nature.

Prairie Plant flowers were magnets for bumblebees and butterflies. Overall, Sue and Doris were able to identify **33 species of insects** during the hike. The field trip was like a mini Bio Blitz where everyone was able to see some of the insect and bird biodiversity at Indian Springs. Checklists were kept and submitted to

eBird and the park. **Twenty-five species of birds** were tracked along the trail. Checklists are listed below. The hike concluded at the Environmental Discovery Center which is a great place to see nesting Barn Swallows. The swallows did not disappoint.

**A special thank you to Doris Applebaum and Sue Greenlee** for sharing their time and expertise with the young birders club. One young birder said that the field trip was FUN which is a compliment to Sue and Doris who made learning about insect exciting and interactive.

The OAS field trip committee has instituted some health guidelines during the pandemic which includes socially distancing on the trail, wearing face masks and pre-registering in advance to limit the group size.

**Butterfly Checklist:**

Giant Swallowtail  
Eastern Tiger Swallowtail  
Cabbage White  
Clouded Sulphur  
Orange Sulphur  
Eastern Tailed-Blue  
Pearl Crescent  
Red-spotted Purple  
Common Ringlet  
Common Wood-Nymph  
Monarch

Silver-spotted Skipper  
Wild Indigo Duskywing

**Insect Checklist:**

Black Saddlebags  
Common Whitetail  
Widow Skimmer  
Blue Dasher  
Allard's Ground Cricket  
Allegheny Mound Ant  
Bumblebee  
Carolina Grasshopper  
Carolina Ground Cricket  
Common Meadow Katydid

Dog-day Cicada  
Fall Field Cricket  
Fall Webworm  
Goldenrod Gall Fly  
Honeybee  
Shining Flower Beetle  
Soldier Beetle  
Spur-throated Grasshopper nymph  
Two-spotted Tree Cricket  
Two-striped Grasshopper

**Bird checklist:**

Mallard  
Mourning Dove  
Great Blue Heron  
Turkey Vulture  
Red-bellied  
Woodpecker  
Downy Woodpecker  
Northern Flicker  
Eastern Phoebe  
**Eastern Kingbird**  
Blue Jay  
American Crow  
Black-capped  
Chickadee

Barn Swallow  
European Starling  
Gray Catbird  
American Robin  
Cedar Waxwing  
House Sparrow  
American Goldfinch  
Chipping Sparrow  
Field Sparrow  
Eastern Meadowlark  
Red-winged Blackbird  
Common Grackle  
Northern Cardinal
